EDUCATION

M.Sc. (Physics) - 77.2%

University of Madras

July 2011

B.Sc. (Physics) - 82.0%

University of Madras

July 2009

PROJECTS

Master Data Management System(in ReBIT)

- This project is meant for managing essential data for overall usage by RBI staff.
- I introduced many UI modules to incorporate essential features into the application with Unit test case. I also used springboot and SQL with Oracle DB.

IT service management(in Wolken)

- This intelligent platform is used for Project Management in IT, I skillfully utilized the Angular Framework for API integrations, bug fixes and feature enhancements.

Portfolio App (Personal Project)

- I created a personal portfolio project (<https://asknehu.com>) where I share numerous articles on various tech stacks, detailing what I've learned, utilized, and understood. For the front end, I employed the Angular framework, while using AppScript and Google Sheets as the database.

E-commerce WebApp (Personal Backend Project)

- I created a backend e-commerce project using MySQL and Spring Boot, where I utilized various tools like JDBC, Hibernate, and others.
